

# Objective C Mini Test 3

Thursday 26th January 2012

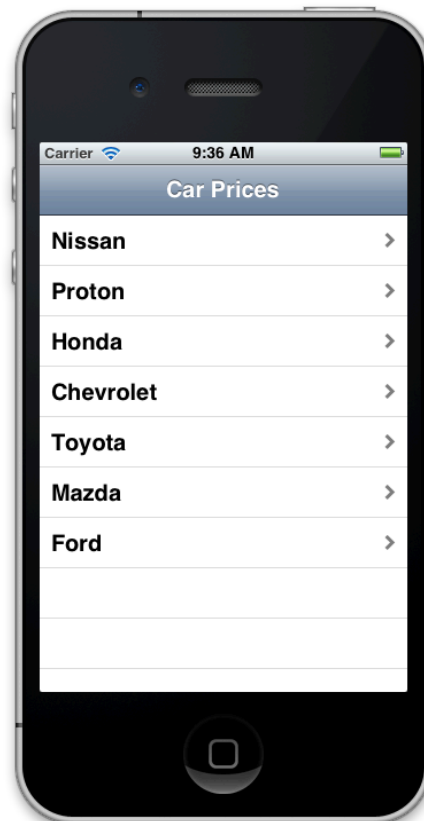

*Complete in 30 minutes for 5 extra points,  
45 minutes for 3 extra points,  
60 minutes for 1 extra point.*

Download the project [minitest3.zip](#). Your task is to complete the implementation of an iPhone app for Car Prices.

The application will have 3 screens:

1. A list of car **makes** (e.g. Mazda, Honda, etc).
2. When you select a **make**, then show a list of **models** (e.g. Brio, City, Jazz, Civic).
3. When you select a **model**, then show a list of **specs & prices** (e.g. City S MT 534,000baht).

Example of screen 1:

Points will be awarded for Style (out of 2) and Functionality (out of 3).
