

# Assignment 2

Submission Deadline: Monday 26th September 2011

## Update

*Congratulations, you got the job!*

The Tourism Authority of Thailand (TAT) called yesterday to say: "Wow! Love the prototype! Can you build us a full iPhone app?"

The TAT have asked you to develop more features for the application. In particular, they would like to see maps added. You can also add any other features as appropriate.

## Requirements

Extend your iPhone application from Assignment 1. The app should contain a map of tourist attractions in Phitsanulok. For extra marks, add any new features to the app.

TAT has sent an updated XML file that contains GPS coordinates for the tourist attractions in Phitsanulok. Download the file here: <http://harfield.org.uk/complangs/attractions.xml>

## Guidelines

- You must work on your own. No copying!
- You can use the Facebook group to ask questions.

## Assessment

Your work will be assessed as follows:

- Added a map to the app, included pins and linked to other views (5 marks).
- Added other new features (5 marks).
- Good coding style (3 marks).
- Compiles and runs without errors (2 marks).

## Submission

Please submit your code (as a zip file) by email to [antonyh@nu.ac.th](mailto:antonyh@nu.ac.th) and include your name and student code.
